Al Shirawi U.S. Chillers Named Dolphin WaterCare™ Sales Engineering Representative in Dubai, United Arab Emirates

ESSEX, CONNECTICUT. Dolphin WaterCare™, a Division of Clearwater Systems Corporation, recently announced its business alliance with Al Shirawi U.S. Chillers LLC. Based in Dubai, United Arab Emirates (U.A.E.), Al Shirawi U.S. Chillers is a joint venture organization between Al Shirawi Electrical & Mechanical Engineering and U.S. Chiller Services, a district cooling plant operator and heavy tonnage chiller service provider with operations in the U.S A. and Middle East. Oasis Investment Company LLC, the parent company of Al Shirawi, has broad interests in heavy manufacturing, automotive, and air conditioning distribution and other specialized facility services in the U.A.E and the Middle East. John E. Dresty, Jr., President and CEO of Clearwater Systems, is pleased to make this announcement, recognizing that “Al Shirawi U.S. Chillers, as the U.A.E. undisputed market leader in the field of chiller services, is very well positioned to bring our environmentally sustainable water treatment technology to the UAE.” Dan Mizesko, Managing Partner of Al Shirawi U.S. Chillers added: “In a region where both water and electricity grids are stretched to the limit by unprecedented growth, the Dolphin WaterCare™ programs offered by Al Shirawi U.S. Chillers will save energy and conserve water resources for our customers right now and in the future. The benefits of the Dolphin System™ technology, combined with our operational expertise, will allow us to offer our customers the most efficient district cooling plant operations available anywhere in the world.”
